

UPGRADE TO ENERGY EFFICIENT LIGHTING AND START SAVING IN SIX EASY STEPS

1

Free Building Assessment

We evaluate your facility's existing lighting and assess your specific needs.

2

Custom Proposal

Your proposal includes a customized lighting recommendation, ROI and payback calculations.

3

Install Plan

We conduct a final walkthrough and schedule your installation appointment.

4

Utility Approval

We work with your utility to obtain project approval and maximize your rebate.

5

Installation

A new lighting system is installed with minimal disruption to your organization.

6

Start Saving

Save up to 75% on your lighting electricity usage with quality LEDs.*
